DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1- 10, 15 – 19 and 29 – 40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 - 14 of U.S. Patent No. 6,208,724. Although the conflicting claims are not identical, they are not patentably distinct from each other. Basically, the claimed subject matter is the same in the instant application as in the 6,208,724 patent, except applicant is seeking to broaden the claims. Additionally, claim 40 of the instant application is identical to claim 14 in the 6,208,724.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

Art Unit: 2642

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 – 10, 15 – 19 and 29 – 39 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by U.S. Patent No. 5,642,410 (Walsh et al.).

Walsh et al. teach a communication system comprising at least one telephone switch and a communication device and an interface between the telephone switch and the communication device and serving as a protocol interpreter of multiple switch protocols for producing a common format to enable communication between the telephone switch and communication device (see Col. 2, lines 52 – 55 and Col. 11, line 13 – Col. 13, line 55).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

U.S. Patent No. 5,404,396 (Brennan) – see Col. 2, line 5 – Col. 26, line 13.
